SUMMARY

Computer Science undergraduate with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and Software Engineering. Proficient in Java and Python, with hands-on experience building LLM-powered applications, RAG pipelines, conversational AI systems, and full-stack web solutions. Experienced with GPT-based models, Claude models, prompt engineering, AI agents, and Generative AI application development. Familiar with Microsoft Azure services, cloud-based application deployment, and modern development workflows using Git, GitHub, and GitHub Actions. Passionate about solving complex engineering problems and building scalable AI-driven software solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Problem Solving, Algorithm Design

Software Development: HTML, CSS, JavaScript, Flask, REST APIs, Backend Development, Full-Stack Development

Generative AI & LLMs: Large Language Models (LLMs), GPT Models, Claude Models, Prompt Engineering, RAG, AI Agents, NLP, Sentiment Analysis, Semantic Search

Cloud & Azure: Microsoft Azure, Azure AI Foundry, Azure OpenAI, Azure App Services, Azure Container Apps, Azure Blob Storage, Azure Static Web Apps, Azure Functions

Development & DevOps: Git, GitHub, GitHub Actions, CI/CD, API Integration, Cloud Deployment, VS Code, Jupyter Notebook

Databases: MySQL, Database Design, Query Optimization, Pandas, NumPy, Scikit-learn

Machine Learning & AI: Scikit-learn, Pandas, NumPy, NLP, Sentiment Analysis, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Azure OpenAI, AI Agents, Prompt Engineering

Tools & Platforms: Git, GitHub, Azure AI Foundry, VS Code, Jupyter Notebook

Engineering Concepts: Software Engineering, SDLC, Debugging, Testing, System Design

PROJECTS

RAG-Based AI Agent | Python, Azure OpenAI, RAG, Flask, MySQL

May 2026 - June 2026

- Developed an LLM-powered Retrieval-Augmented Generation (RAG) system for retrieving relevant information from external knowledge sources and generating context-aware responses.
- Designed prompt engineering strategies and integrated GPT-based models to improve response relevance, consistency, and grounded generation.
- Implemented semantic search and document retrieval pipelines to enhance information retrieval and reduce hallucination in generated responses.
- Integrated Azure AI services and model APIs with Flask-based backend services to support intelligent query processing and conversational interactions.
- Worked with cloud-based application components and storage workflows to build a scalable architecture for AI-powered information retrieval.

Azure AI Chatbot | Python, Flask, Azure OpenAI, HTML, CSS, JavaScript, MySQL

June 2026 - July 2026

- Built a full-stack conversational AI chatbot using LLM-based APIs to support real-time, context-aware user interactions through a web interface.
- Developed RESTful backend services with Flask and integrated GPT-based models for natural language understanding and response generation.
- Applied prompt engineering techniques to structure model interactions and improve response quality across conversational use cases.
- Implemented database-backed conversation history to maintain session context and improve continuity across interactions.
- Integrated cloud-based Azure services and application components while following modular API-driven architecture for scalable deployment.
- Used Git and GitHub-based development workflows to manage source code, changes, and project iterations.

EDUCATION

VIT Bhopal University, Madhya Pradesh

Computer Science and Engineering

All Saints School, Agra

Class 12th

September 2024 - Present

April 2022 - April 2024

ACHIEVEMENTS

- Solved 150+ Data Structures & Algorithms problems across LeetCode and GeeksforGeeks, maintaining consistent problem-solving practice.
- Maintaining consistency through the Dr. G. Viswanathan Coding Challenge.
- Achieved a CGPA of 8.71/10 in B.Tech Computer Science.
- Participated in the MediaMorphosis Hackathon and collaborated on innovative problem-solving projects.
